

Page Sizing

You can change the text size on our website and most other websites very easily

On a phone or tablet

The accessibility settings of your own device will allow you to change the basic text size for all websites that you visit. Look in your device settings for the correct options.

You can also tap or pinch/pull the screen to zoom in to any part of our pages.

On a desktop or laptop computer

Pressing Ctrl and the + (plus) key together increases the text size of your browser. You can keep pressing Ctrl and + multiple times to keep increasing the text size.

Ctrl and - (minus) keys reduce the text size.

Ctrl and 0 (zero) resets the text size back to your browser default.
